

Student apprentice (m/f) in the field software development

As a student apprentice (m/f), in the field software development, you are working for one of the most happening agencies in Germany. Cocomore is actively involved in the developer community, organizes camps and provides speakers at conferences. In cooperation with the W3C group, the DFKI (German Research Center for Artificial Intelligence), and the Fraunhofer Institute we implement pioneering projects. You are an impassioned coder? You appreciate tasks, which challenge you every day? Then we would like to get to know you!

Key Tasks & Responsibilities:

- Agile software development with continuous integration and test automation
- Working in an agile cross-functional expert team
- Collaboration of the technical support our web portals
- An agile mindset concerning modern project management using Scrum
- Active shaping and continuous improvement our agile advance models

Skills & Experiences:

- PHP-knowledge and experience in software design principles
- Knowledge in the enforcement of software tests (e.g. Selenium, Sahi or Behat)
- Good understanding of web applications and their underlying technologies
- Good knowledge of JavaScript, HTML, CSS, data base, and coding (SQL, MySQL)
- High motivation, reliability, and a good organization, as well as social competence, team spirit, and communication skills
- Fluency in written and spoken English are essential for the project

Job Benefits:

- A funded internship
- Exciting work experience giving you the opportunity to take responsibility and to develop your professional skills further
- Excellent interpersonal skills, team-work, and independent working capability
- Flat hierarchies and short decision paths
- Training opportunities through workshops, camps, and conferences

Wer wir sind:

Cocomore is an agency for communication and IT with 140 employees and offices in Frankfurt/Main, Geneva, and Seville. Cocomore develops and runs advertising, CRM, and e-commerce solutions. Among Cocomore's clients are Nestlé, Procter & Gamble, Rossmann, RTL, Sanofi, and the VDMA. We have completed projects in over 30 countries and we are member of the World Wide Web Consortium (W3C) and the BVDW.
